Gulf Publishing Company's

Software Reference Guide

Upstream/Midstream/Downstream

Spring 2006

This matrix provides a quick reference to vendors of software for various energy applications. Those companies in bold have product and contact information in their listings within the guide.

Color Key:

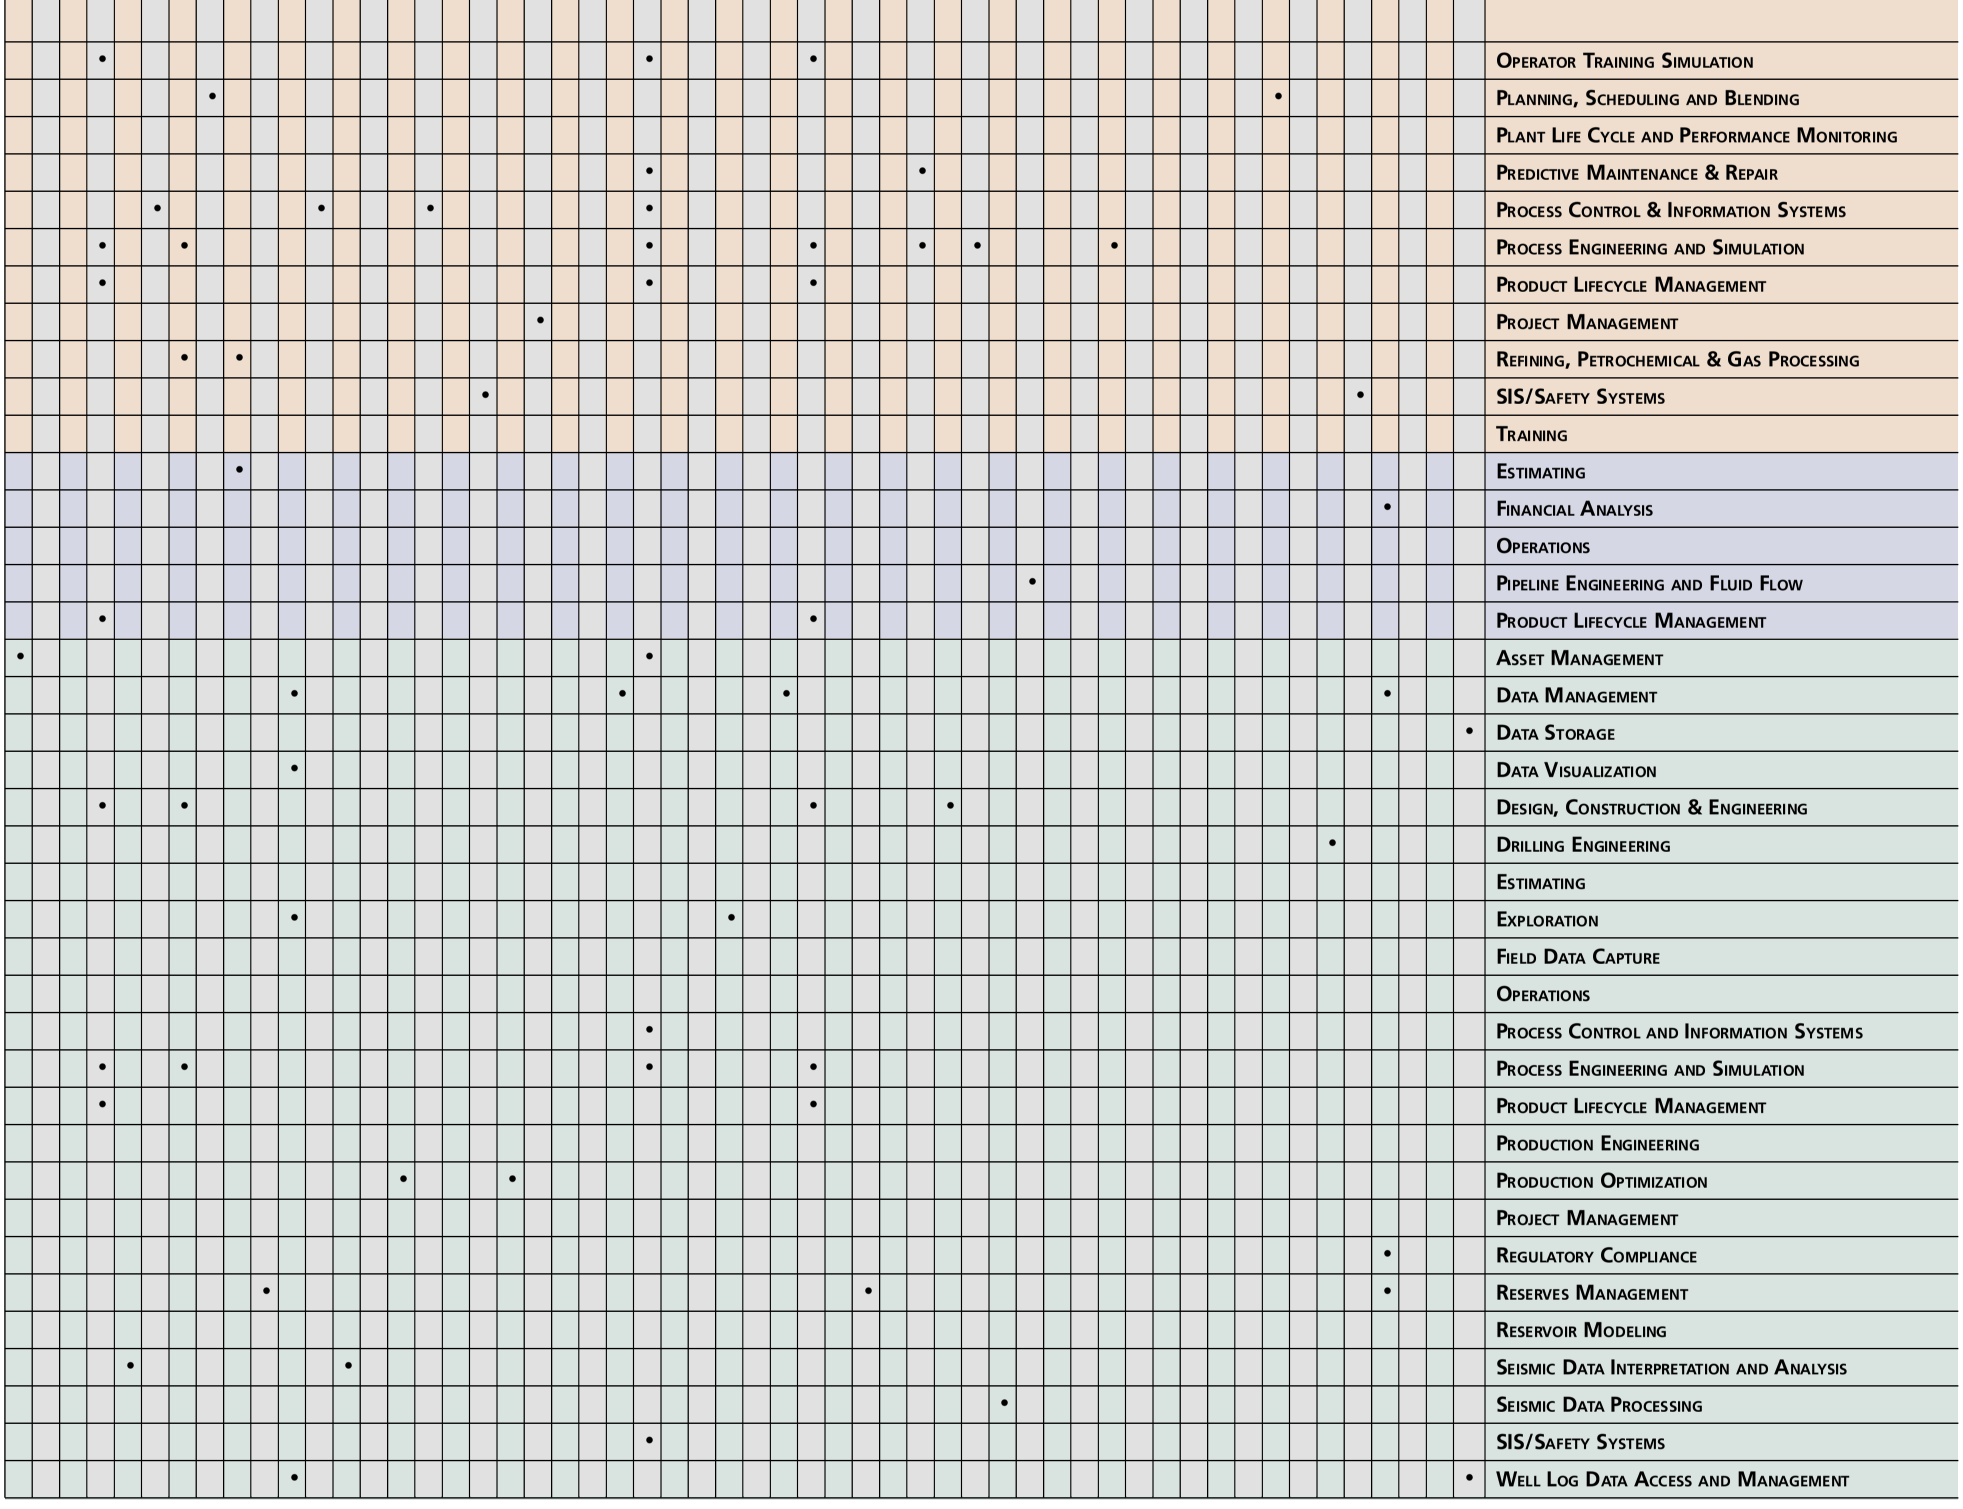
Business Management

Downstream

Midstream

Upstream

	Accounting and Statistics	Budgeting, Capital Allocation & Planning	Business Integration	Data Storage	E-Commerce	Enterprise Operations Management	Financial Analysis	Internet Solutions	Land and Leasing	Operations	Plant Lifecycle and Performance Monitoring	Product Lifecycle Management	Production Accounting	Regulatory Compliance	Risk Management	Training	Asset Management	Collaboration and Knowledge Capture	Critical Condition Management	Design, Construction and Engineering	Dynamic Simulation & Optimization	Economic Evaluation	Energy Management	Enterprise Portal Systems	Estimating	Fluid Flow Analysis	Instrumentation Engineering	Online Monitoring & Optimization
A2D Technologies					•																							
ABB											•																	
ABZ Inc.																										•		
aclaro softworks		•	•	•	•		•	•						•														
ACM Facility Safety																												
Advanced Geotechnology																												
Allegro Development													•															
AMI Consultants																												
Aspen Technology																	•											
Asset Performance Networks																	•											
Avatar Systems						•																						
AVEVA																				•								
Bolo Systems													•															
Bryan Research & Engineering																												
Capstone Engineering																	•											
CD adapco Group																										•		
C-FER Technologies																												
CGG																												
Chemstations																				•	•							•
COADE																		•		•								
Codeware, Inc.														•						•								
Coemergence																		•										
Computer Modelling Group																												
Cyco Software																	•											
Dassault Systemes			•									•		•				•		•								
Decision Dynamics Technology																												
Decisioneering															•													
Digital Formation																												
Dyadem															•													
Earth Decision Sciences																												
Emerson Process Management											•					•	•										•	
Enertia Software																												
Engineered Software																										•		
Ensyte Energy Software			•																									
EPCON International																												
eProduction Solutions																												
exida																												
Expertune																	•											
Falconeer Technologies																												
Fekete Associates																												
Flexware																												•
Fugro Jason																												
Gensym																												
geoLOGIC systems									•																			
Geomechanics International																												
Gulf Publishing Co.																				•							•	
Haverly Systems																												
Heat Transfer Research Inc. (HTRI)																				•			•					
Honeywell Process Solutions																												
I/O																												
IBM			•									•		•				•		•								
ICONICS																	•											
Ideas International	•																											
IHS Energy Group																												



Operator Training Simulation
Planning, Scheduling and Blending
Plant Life Cycle and Performance Monitoring
Predictive Maintenance & Repair
Process Control & Information Systems
Process Engineering and Simulation
Product Lifecycle Management
Project Management
Refining, Petrochemical & Gas Processing
SIS/Safety Systems
Training
Estimating
Financial Analysis
Operations
Pipeline Engineering and Fluid Flow
Product Lifecycle Management
Asset Management
Data Management
Data Storage
Data Visualization
Design, Construction & Engineering
Drilling Engineering
Estimating
Exploration
Field Data Capture
Operations
Process Control and Information Systems
Process Engineering and Simulation
Product Lifecycle Management
Production Engineering
Production Optimization
Project Management
Regulatory Compliance
Reserves Management
Reservoir Modeling
Seismic Data Interpretation and Analysis
Seismic Data Processing
SIS/Safety Systems
Well Log Data Access and Management
